PODIATRY ASSOCIATES OF BELLEVILLE, PC  
155 Belleville Avenue, Belleville, NJ 07109  
973-450-0878 • drfoot.tv

"We believe the road to success is always under construction," says Dr. John Cozzarelli, who founded Podiatry Associates of Belleville 20 years ago. He and Dr. Joseph Cione, both board-certified podiatric surgeons, provide state-of-the-art treatment for the full range of foot, ankle and lower extremity disorders. These highly trained specialists share the same practice philosophy. "We treat patients as family members and strive to help them feel better as quickly as possible," says Dr. Cione.

Recognized for innovative, leading-edge care, including less-invasive procedures for quicker recoveries, the physicians utilize techniques and treatments not yet available in most podiatry practices. They offer advanced radiofrequency nerve ablation; platelet-rich plasma (PRP) procedures or extracorporeal pulse activation therapy (EPAT) for chronic heel pain; musculoskeletal ultrasound imaging; and nerve decompression surgery to reverse the symptoms of drop foot and diabetic neuropathy. Dr. Cozzarelli was first in the state to offer the FAST™ (focused aspiration for soft tissue) procedure for chronic Achilles tendonitis and plantar fasciitis, and was among the first on the East Coast to utilize the PinPointe™ FootLaser™ for toenail fungus. Both doctors are widely published.

Dr. Jessica Addeo, Dr. Julian Sansone and an outstanding staff complete this exceptional practice.

HOSPITAL AFFILIATIONS: HackensackUMC Mountainside, Montclair; Clara Maass Medical Center, Belleville; Essex Surgical Arts Surgery Center, Belleville. MEDICAL TRAINING: Dr. Cione: New York College of Podiatric Medicine (DMP); Franciscan Health Systems of New Jersey (residency).
